In partnership with:

Kubu allows housing associations to equip their homes with industry-accredited smart technology, that exceeds the UK Government's Internet of Things requirements and the only product of its type to be Secured By Design - Secure Connected Device accredited.

Smart Sensors for Social Housing

Features & Benefits

With a burglary taking place every 40 seconds in the UK, these statistics certainly ring alarm bells!

That's where Kubu can help...

Available to your tenants as a low-cost optional upgrade, Kubu is an affordable suite of concealed smart sensors that monitor the security status of window and door locks in real-time, providing homeowners with unprecedented insights into their home's security.

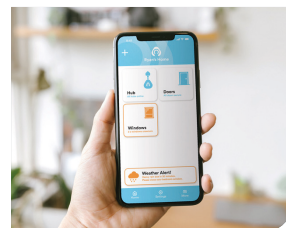

Kubu detects whether a door is physically locked or unlocked by the turn of a key, and whether a window is open, closed, fully locked or even left in night vent mode.

Users receive real-time status notifications and can even be alerted as they leave their property, ensuring they'll never accidentally leave their home unsecure again.

But there's more to Kubu than just security - it can also contribute to the energy efficiency of the home.

By reminding you to close your doors and windows, Kubu helps to prevent unnecessary heat loss, especially during colder months.

It can even communicate with your smart heating system to lower or turn off the heating in that particular room.

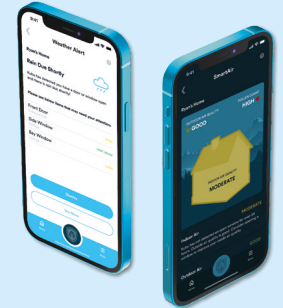

Smart Sensors

- See at a glance if your doors and windows are:
Locked, Unlocked, Open, Closed or even in Vent Mode.
- Low Maintenance / Calibration FREE
